Preface.

With pleasure this the Second edition of Henderson's City of Saskatoon Directory is presented to our patrons. The continuation of the healthy growth of this beautiful city is a source of gratification and we have faithfully chronicled this prosperity in this volume.

We claim again that this volume represents more fully and clearly than any other medium the development of the city. This fact has appealed to the business community and we have added to the list of our patrons considerably, the business public appreciating the inauguration of a city directory distinct from the Western Canada Gazetteer which has hitherto served. This enables us to present a good sized volume with fine typographical appearance. We heartily thank our patrons for their appreciation and also all those who have assisted us in obtaining full and reliable information and have endeavored to show our gratitude by the pains we have taken for accuracy and completeness of information.

We are, yours sincerely,

City of Saskatoon.

An incorporated city (May 29, 1906,) on the South Saskatchewan River, on the Prince Albert branch of the C. N. R., 160 miles north of Regina, and 87 miles from Prince Albert. The main line of the C.N.R. is about 14 miles northwards at Warman.

Has three sash and door factories, flour mill and machine shop, eight churches and three public schools, two daily and two weekly newspapers, seven chartered banks, hospital and eight licensed hotels.

Saskatoon is the natural distributing centre of the great Saskatchewan Valley of Western Canada, a hard wheat area unequalled in the whole world for extent and fertility.

It is the divisional point on the Prince Albert branch of the C. N. R., and the crossing point (bridge 962 feet long) on Saskatchewan River for the Kirkella branch and the Sheho branch of the C.P.R. which is building westward to Wetaskiwin, thus giving the C.P.R. a short line from Winnipeg to Edmonton.

The Grand Trunk Pacific Railway are constructing their main line (transcontinental) through the southern suburbs of Saskatoon.

The location of the City, on the banks of the Saskatchewan River, is very fine. The foliage along the river banks affords a pleasant change from the monotony of the ordinary prairie town. Nutana, on the south bank of the river, is situated on high ground, on a level with the surrounding prairie, and overlooking the business district. It was the original townsite of Saskatoon, but is now within the corporation limits, the area of which is about four square miles.

The climate of the Saskatchewan Valley is exempt from extremes of heat or cold and from high winds, while there is an abundance of bright sunshine throughout the year.

The executive of the city, under the new charter, will consist of three commissioners, who shall be the Mayor and two others to be appointed by the Council, under whose guidance they will act and to whom they shall report.

The Corporation owns and operates its own gas and electric lighting plant. The system of waterworks and sewerage is being extended considerably this year.

The pumping plant of the waterworks system is situated on the North side of the Saskatchewan River, above C. P. R. bridge and consists of a reciprocating pump with capacity of 700 gals. per minute. This draws its feed from the sedimentation basin 400x200 feet. There are 34,000 feet of mains, varying from 12 in. to 4 in., and 73 fire hydrants. Stand pipe with capacity of 160,000 gals. is on the Nutana side of the river. It is 80 feet in height, the base being 64 feet above the level of the C. N. R. station. The domestic pressure from the full stand pipe will be 80 lbs. in the business portion of the city. For fire purposes, direct pump pressure will be 125 lbs.

There are at present five bridges erected and being built across the Saskatchewan River at Saskatoon.

The sewerage system installed comprises 29,000 feet of vetrified tile pipe sewers emptying into the river one mile below the centre of the city.

The electric light system consists of a 225 kilowat generator with a capacity of 25,000 c.p. lights. There are 28 arc lamps for street lighting.

There are two telephone systems, the Automatic and the North-western.

SYSTEM OF STREET NAMES AND NUMBERING.

Streets run east and west.

Avenues run north and south.

The townsite has been laid out allowing 18 streets in Nutana south of the Saskatchewan River. Eighth to Eighteenth Streets being within the Corporation limits; while First Street to Seventh Street lies south of the southern city limits. First Street to Eighteenth Street are in Nutana; Nineteenth Street being the first street on the west side of the River, East of the C. N. R. tracks and west of the River streets are numbered from Nineteenth to Twenty-sixth, West of the C. N. R. tracks in Riversdale streets number north from Eleventh to Thirty-third, the northern city limits.

With the Avenues the C. N. R. tracks are the dividing line. Avenues First, Second, Third, Fourth and Fifth running north and south and paralleling the C. N. R. tracks to the east are arranged numerically from the C. N. R. to the Saskatchewan River. West of the C. W. R. avenues are arranged alphabetically from Avenue A to Avenue P, the western city limits.

In Nutana the street information is taken east from the Saskatchewan River to eastern city limits. On the Avenues north from 8th Street the southern city limits. The system of house numbering adopted by various cities throughout the continent known as the Decimal or Philadelphia system, viz., an even hundred numbers are allotted to each block, the principal advantage of the system is that the number indicates how many blocks distant it is from any given point on a street or avenue.

On the Avenues, which run north and south, a number is allotted for every 12 feet and on streets running east and west, a number is allotted for every 15 feet.

Odd numbers on the east and north sides. Even numbers on the west and south sides.
